By (date and time) June 6, 2025, 4PM By (date)						
Purpose of the proposal and its anticipated effects, including any changes in existing rules: RCW 84.33.091 requires the Department to revise the stumpage value tables every six months. The Department establishes the stumpage value tables to apprise timber harvesters of the timber values used to calculate the timber excise tax, WAC 458-40-660. The values in the proposed rule will apply July 1, 2025, through December 31, 2025. Reasons supporting proposal: This proposal provides the revised stumpage value tables for July 1, 2025, through						
December 31, 2025.						
Statutory authority for adoption: RCW 82.01.060(2) and RCW 84.33.096						
Statute being implemented: RCW 84.33.091 and RCW 84.33.140

AMENDATORY SECTION (Amending WSR 25-01-052, filed 12/11/24, effective 1/1/25)

WAC 458-40-660 Timber excise tax—Stumpage value tables—Stumpage value adjustments. (1) Introduction. This rule provides stumpage value tables and stumpage value adjustments used to calculate the amount of a harvester's timber excise tax.

(2) **Stumpage value tables.** The following stumpage value tables are used to calculate the taxable value of stumpage harvested from ((January 1 through June 30, 2025)) <u>July 1 through December 31, 2025</u>:

Washington State Department of Revenue WESTERN WASHINGTON STUMPAGE VALUE TABLE

((January 1 through June 30, 2025))

<u>July 1 through December 31, 2025</u>

Stumpage Values per Thousand Board Feet Net Scribner Log Scale⁽¹⁾
Starting January 1, 2019, there are no Haul Zone adjustments.

- Log scale conversions Western and Eastern Washington. See conversion methods WAC 458-40-680.
- (2) Includes Western Larch.
- (3) Includes all Hemlock, Spruce and true Fir species, and Lodgepole Pine in SVA 6-7, or any other conifer not listed on this table.
- (4) Includes Alaska-Cedar.
- (5) Includes Western White Pine in SVA 6-7.
- (6) Stumpage value per ton.
- (7) Stumpage value per cord.
- (8) Includes Lodgepole posts and other posts, Stumpage value per 8 lineal feet or portion thereof.
- (9) Stumpage value per lineal foot.
- (3) Harvest value adjustments. The stumpage values in subsection (2) of this rule for the designated stumpage value areas are adjusted for various logging and harvest conditions, subject to the following:
- (a) No harvest adjustment is allowed for special forest products, chipwood, or small logs.
- (b) Conifer and hardwood stumpage value rates cannot be adjusted below one dollar per MBF.
- (c) Except for the timber yarded by helicopter, a single logging condition adjustment applies to the entire harvest unit. The taxpayer

[3] RDS-6290.1

must use the logging condition adjustment class that applies to a majority (more than 50 percent) of the acreage in that harvest unit. If the harvest unit is reported over more than one quarter, all quarterly returns for that harvest unit must report the same logging condition adjustment. The helicopter adjustment applies only to the timber volume from the harvest unit that is yarded from stump to landing by helicopter.

- (d) The volume per acre adjustment is a single adjustment class for all quarterly returns reporting a harvest unit. A harvest unit is established by the harvester prior to harvesting. The volume per acre is determined by taking the volume logged from the unit excluding the volume reported as chipwood or small logs and dividing by the total acres logged. Total acres logged does not include leave tree areas (RMZ, UMZ, forested wetlands, etc.,) over two acres in size.
- (e) A domestic market adjustment applies to timber which meet the following criteria:
- (i) **Public timber** Harvest of timber not sold by a competitive bidding process that is prohibited under the authority of state or federal law from foreign export may be eligible for the domestic market adjustment. The adjustment may be applied only to those species of timber that must be processed domestically. According to type of sale, the adjustment may be applied to the following species:

Federal Timber Sales: All species except Alaska-cedar. (Stat. Ref. - 36 C.F.R. 223.10)

State, and Other Nonfederal, Public Timber Sales: Western Redcedar only. (Stat. Ref. - 50 U.S.C. appendix 2406.1)

(ii) **Private timber** - Harvest of private timber that is legally restricted from foreign export, under the authority of The Forest Resources Conservation and Shortage Relief Act (Public Law 101-382), (16 U.S.C. Sec. 620 et seq.); the Export Administration Act of 1979 (50 U.S.C. App. 2406(i)); a Cooperative Sustained Yield Unit Agreement made pursuant to the act of March 29, 1944 (16 U.S.C. Sec. 583-583i); or Washington Administrative Code (WAC 240-15-015(2)) is also eligible for the Domestic Market Adjustment.

The following harvest adjustment tables apply from ((January 1 through June 30, 2025)) July 1 through December 31, 2025:

TABLE 9—Harvest Adjustment Table Stumpage Value Areas 1, 2, 3, 4, 5, and 9 ((January 1 through June 30, 2025)) July 1 through December 31, 2025

Type of Adjustment	Definition	Dollar Adjustment Per Thousand Board Feet Net Scribner Scale
I. Volume per a	cre	
Class 1	Harvest of 30 thousand board feet or more per acre.	\$0.00
Class 2	Harvest of 10 thousand board feet to but not including 30 thousand board feet per acre.	-\$15.00
Class 3	Harvest of less than 10 thousand board feet per acre.	-\$35.00
II. Logging con	ditions	
Class 1	Ground based logging a majority of the unit using tracked or wheeled equipment or draft animals.	\$0.00

Type of Adjustment	Definition	Dollar Adjustment Per Thousand Board Feet Net Scribner Scale
Class 2	Logging a majority of the unit: Using an overhead system of winch-driven cables and/or logging on slopes greater than 45% using tracked or wheeled equipment supported by winch- driven cables.	-\$85.00
Class 3	Applies to logs yarded from stump to landing by helicopter. This does not apply to special forest products.	-\$200.00
III. Remote isla	nd adjustment:	
	For timber harvested from a remote island	-\$50.00
IV. Thinning		
	A limited removal of timber described in WAC 458-40-610 (29)	-\$100.00

TABLE 10-Harvest Adjustment Table Stumpage Value Areas 6 and 7

4	Type o Adjustn		Definition	Dollar Adjustment Per Thousand Board Feet Net Scribner Scale
	I. Volume	per acre		
	Class 1	Harvest of board feet	f more than 8 thousand per acre.	\$0.00
	Class 2	Harvest of acre and le	f 8 thousand board feet pess.	-\$8.00
	II. Loggir	ng conditions		
	Class 1	less than 4	ity of the harvest unit h 10% slope. No significations or swamp barriers.	
	Class 2	slopes bety	rity of the harvest unit h ween 40% and 60%. So ops or swamp barriers,	
	Class 3	rough, bro	ity of the harvest unit has been ground with slopes Numerous rock outcrop.	
	Class 4	to landing	logs yarded from stum by helicopter. This doe to special forest produc	s
		cable logging is regulation. Writ	required by a duly pro	slopes less than 40% when mulgated forest practice his requirement must be nent of revenue.

III. Remote island adjustment:

For timber harvested from a remote -\$50.00

IV. Thinning

A limited removal of timber described in WAC 458-40-610 (29) -\$60.00

TABLE 11-Domestic Market Adjustment

Dollar Adjustment Per Thousand Board Feet Class Area Adjustment Applies Net Scribner Scale SVAs 1 through 5 only: \$0.00

Note: This adjustment only applies to published MBF sawlog

(4) Damaged timber. Timber harvesters planning to remove timber from areas having damaged timber may apply to the department of revenue for an adjustment in stumpage values. The application must contain

> [5] RDS-6290.1

a map with the legal descriptions of the area, an accurate estimate of the volume of damaged timber to be removed, a description of the damage sustained by the timber with an evaluation of the extent to which the stumpage values have been materially reduced from the values shown in the applicable tables, and a list of estimated additional costs to be incurred resulting from the removal of the damaged timber. The application must be received and approved by the department of revenue before the harvest commences. Upon receipt of an application, the department of revenue will determine the amount of adjustment to be applied against the stumpage values. Timber that has been damaged due to sudden and unforeseen causes may qualify.

- (a) Sudden and unforeseen causes of damage that qualify for consideration of an adjustment include:
- (i) Causes listed in RCW 84.33.091; fire, blow down, ice storm, flood.
 - (ii) Others not listed; volcanic activity, earthquake.
 - (b) Causes that do not qualify for adjustment include:
- (i) Animal damage, root rot, mistletoe, prior logging, insect damage, normal decay from fungi, and pathogen caused diseases; and
- (ii) Any damage that can be accounted for in the accepted normal scaling rules through volume or grade reductions.
- (c) The department of revenue will not grant adjustments for applications involving timber that has already been harvested but will consider any remaining undisturbed damaged timber scheduled for removal if it is properly identified.
- (d) The department of revenue will notify the harvester in writing of approval or denial. Instructions will be included for taking any adjustment amounts approved.
 - (5) Forest-derived biomass, has a \$0/ton stumpage value.
